Board back

Power

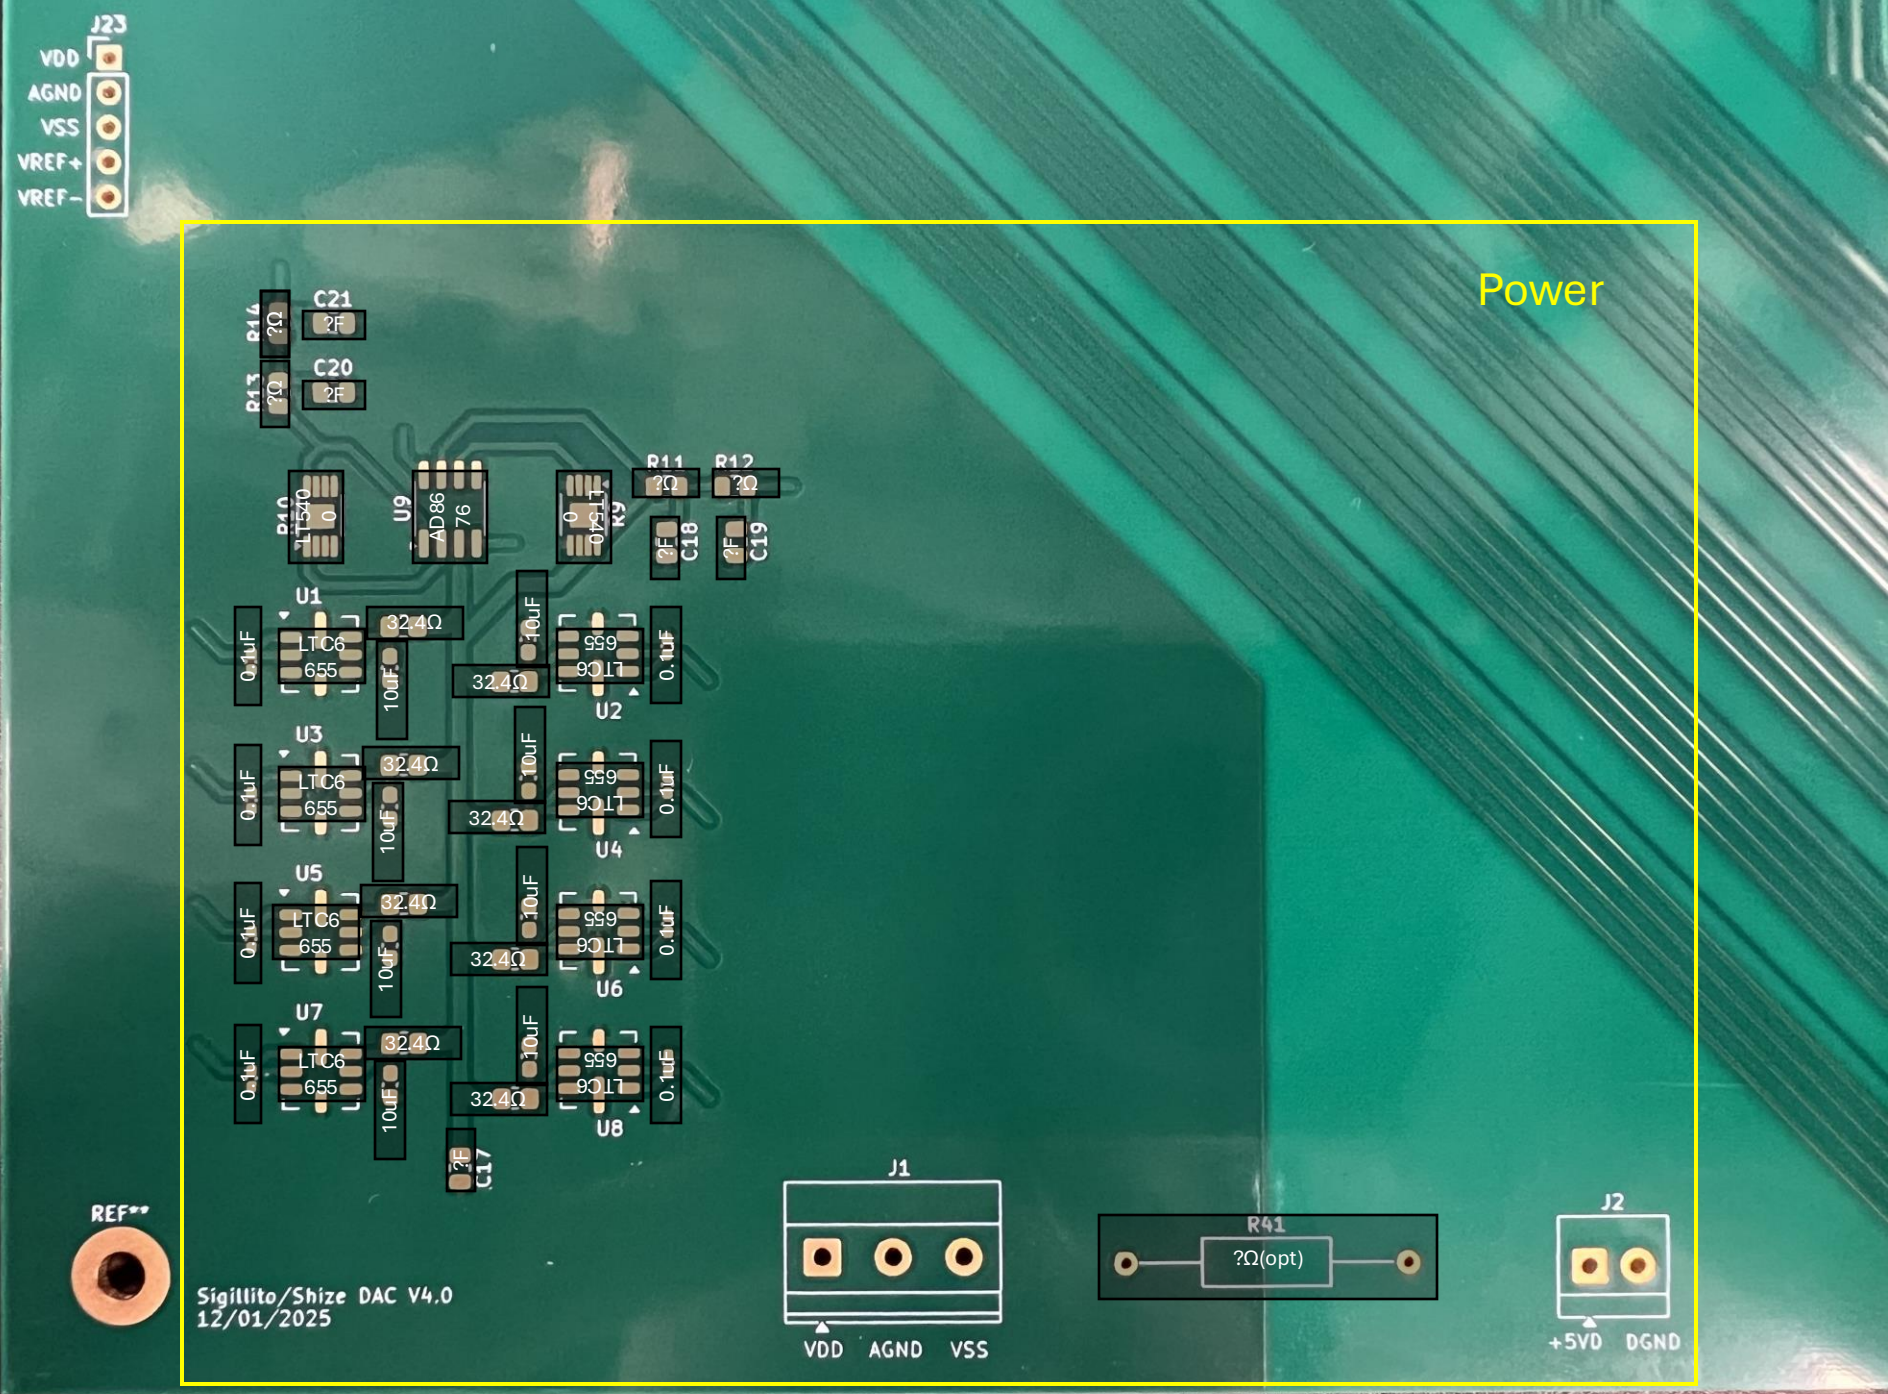

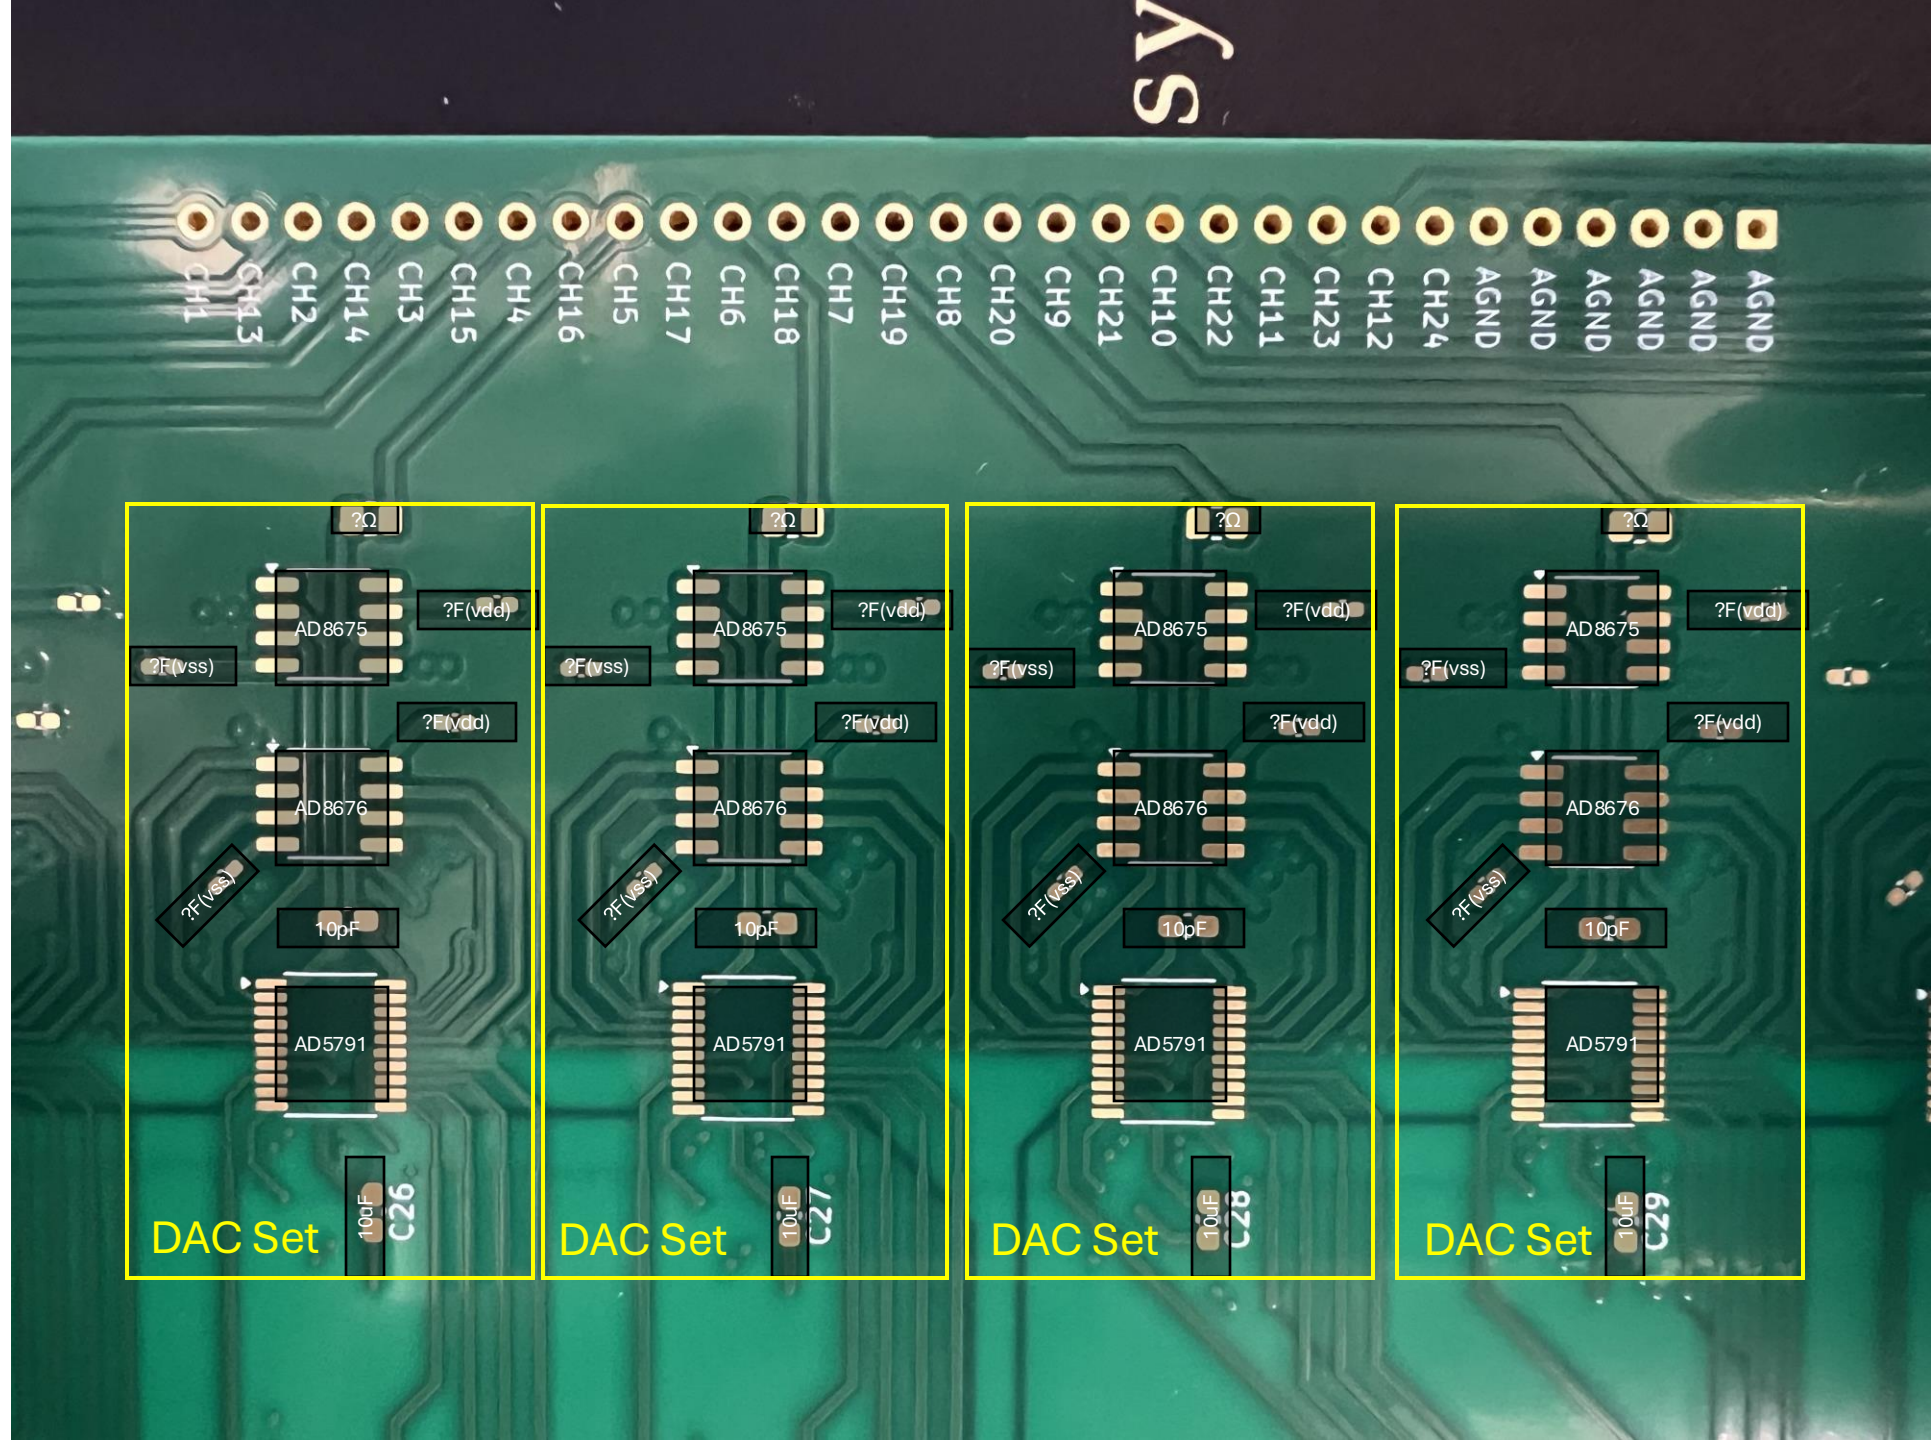

Image shows 4 DAC sets

Same applies to all 24 DAC sets (front and back)

The image shows a green PCB with several integrated circuits (ICs) and passive components. The ICs are labeled ISO6761, ISO690SI, and ISO6761. Each IC is surrounded by four 0.1µF capacitors, forming an isolator set. The PCB also features various other components like resistors (R40, R15) and capacitors (?Ω(lgclev)). Pin headers are visible at the bottom, labeled with signals such as SCLK18, MOSI18, LDAC7, CS20, NGND, MIS07, LDAC19, CS19, MIS019, LDAC8, MIS020, CS7, MIS017, LDAC6, MIS06, CLR, CS6, SCLK6, MOSI6, LDAC5, MIS05, SCLK17, MOSI17, LDAC17, MIS018, CS18, X, and NGND.
